## PlanMe Usability Test

### Test Subject 1

#### Scenario:

You are a businessman working at Synovus. Your job, as well as the errands you struggle to manage on a daily basis, leaves you with little time to spend with your family during the day. The calendar app on your phone has become a jumbled mess of things you have to do during and after work and you are looking for a more organized way to plan out your daily schedule.

**Task 1:** Navigate the PlanMe menu to create a new task to add to your daily planner.

**Task 2:** Create your task as “Run by the store after today’s meeting”, set the time range for this task as 5:00pm – 5:15pm, and favorite it.

**Task 3:** Create the new task and navigate back to the menu. Find your Daily Planner and your task within it.

#### Notes

What changes would you suggest be made to PlanMe after successfully testing it?

- “Add location and notes fields to the event creation page.”
- “If I were to use the app as a replacement for my current calendar/agenda app, the “Create another task/event?” page would grow annoying to me, I think.”
- “I would give more screen-space to the daily view on the app home screen, since my daily calendar is usually full from 9am-6pm or so.”

What aspects of PlanMe do you think work and should not be changed?

- “I love the integration of the various productivity apps and its potential as a single-application solution.”
- “I like the ability to mark events as important.”
- “The interface is really user friendly. More specifically, it is *very* hard to get lost, as each page has a clear objective for the user to complete, which, once complete, leads the user to the next page.”

## Test Subject 2

### Scenario:

You are a student who has recently started grad school. Though you are happy to be there, your schedule certainly is not. Despite having two less classes per semester than the amount you had as an undergrad, your workload seems to have nearly doubled! You need a quick and easy way to keep track of deadlines, take notes, and remind yourself of strict deadlines for your assignments.

**Task 1:** Navigate the PlanMe menu to create a new reminder. Call it, "Weekly Reading Report deadline is TONIGHT!" and set the date and time as "Fri, Nov 6" at 6:00am. Create this reminder.

**Task 2:** From there, navigate through PlanMe to get to the "Notes" tab. Create your note as "The Principles of Quantum Physics Chapter 1 Notes:", and save this new note.

**Task 3:** Finally, find the Schedule tab to see your upcoming events.

### Notes

What changes would you suggest be made to PlanMe after successfully testing it?

- "There needs to be a button to direct the user to the main screen, for simplicity."
- "Minimize the number of pages you need to go through in order to get back to the home screen."
- "Make the app more personalized for the user."

What aspects of PlanMe do you think work and should not be changed?

- "Transition between the pages are flawless."
- "Good accessibility."
- "The ability to personalize your calendar is great."
